Documentation

Some orders require additional documentation prior to releasing to the carrier for transportation. All international orders will require export document preparation, and all orders that ship LTL or FTL will require a bill of lading. Fees are as follows:

Bill of Lading Fee (LTL, FTL, or Customer Pickup)	\$10.00 / order
---	-----------------

Returns Processing

Undeliverable orders (i.e., refused delivery) that arrive at our facility will be processed and placed back into normal inventory. For authorized returns, inventory that passes cursory inspection will be placed back into normal inventory. Failed inventory will be placed and mixed into one master “QUARANTINED” inventory for which you may have rework scheduled, send units to mfg, or request disposal via communication with our customer service staff. Cost below is for processing receipt of returns and does NOT include return shipping or postage.

Returned Item Processing	\$5.00 / item
--------------------------	---------------

Inventory Receipt Processing

All inbound shipments to our facility are subject to [Inbound Guidelines](#). Any non-compliant shipments are subject to the non-compliance fee PLUS hourly labor and supplies necessary to make the shipment compliant, and will experience delay. Sorting of mixed products are subject to hourly processing.

Inventory Receipt Processing	\$2.50 per SKU + \$0.05 per unit
Non-Compliance Fee	\$25.00 / shipment
Sorting Mixed SKUS and other hourly labor	\$38.00 / hour

Storage

The storage fee is derived by the total cubic feet and the storage rate shown below. Charges are calculated daily, so the cubic feet of product on hand at 12 am ET of each day is multiplied by the daily effective rate. The daily effective rate is calculated by the monthly storage rate shown below divided by the number of days in a given month. If the total calculation does not exceed the minimum charge per day for each product, then the minimum charge is accrued. See **Exhibit A** for an example of billing detail:

Standard Volume Storage (minimum charge of \$0.06 per SKU/day)	\$0.02 / cubic foot / day
--	---------------------------

Outbound Shipping

There is a wide selection of shipping options to suit your needs based on transit time and cost. Specific rates are listed on the provided MS Excel sheet “Parcel Shipping Rate Estimator.”
